029 200 8904  
lukec@frequency.nz

#### Experience Summary

Luke is a Project Manager known for his strong attention to detail, he has a commitment to delivering high quality projects, on time problem solving and managerial skills, and with his and under budget. Coming from an engineering and construction background Luke has acquired a wealth of construction expertise starting his career as a Construction Manager that provided him a detailed understanding of Construction, Planning and Programming, Methodology and Health and Safety.

During his career Luke has been involved in a diversity of sectors ranging from Tourism (including 6 star lodges and luxury homes) to social infrastructure and transport, including airports.

Luke has recently completed the fast-tracked design and delivery of Shotover Primary School in Queenstown. He understands the importance of quality management disciplines through design, procurement and construction phases to meet client expectations.

Luke has extensive experience in the design and delivery of projects with challenging logistical constraints and working in live environments. His detailed understanding of design management and construction knowledge make Luke a valuable asset to any project team. Luke is quick to embrace new technologies and has training and experience in implementing BIM model technologies to increase project efficiencies.
